Dave Hunt, CPP, FBCI, has a 34-year background in law enforcement, terrorism response, fire/arson/explosives investigation, hazardous materials response, and emergency medical response. He has worked for DOJ, FEMA, and DHS in every area of national preparedness, in the development and delivery of nationwide assessments, all-hazards plans, counterterrorism and active shooter preparedness training programs, and national preparedness guidance.

He supported development of the nationwide online assessment tools used for grant programs, including development of the nationwide terrorism threat assessment tool with the FBI. Mr. Hunt was part of the development team for the Homeland Security Exercise and Evaluation Program, the nation's standard for design and conduct of emergency preparedness exercises.

Dave Hunt is a subject matter expert on workplace violence and active assailant preparedness. He recently led the effort to develop and deliver a completely revised Active Shooter Preparedness curriculum for the DHS Office of Critical Infrastructure, addressing the needs of critical infrastructure partners in developing and implementing prevention, response and recovery capabilities. He served as a lead instructor for the program and hosted the DHS 96-minute online video: Active Shooter Preparedness Emergency Planning.

He is an instructor for threat management teams, a certified instructor for workplace violence prevention, and was recently selected by ASIS International to serve on the Technical Committee to revise the American National Standard for Workplace Violence Prevention and Intervention and develop an Active Assailant Incident annex.

He has recently developed customized video training and computer-based training on workplace violence prevention and active shooter preparedness for major organizations and government agencies.

Mr. Hunt has conducted enterprise-level corporate crisis management training and exercises for several multi-national corporations, working in the U.S. and overseas. He has conducted risk assessment and continuity programs for major US corporations. He has worked with some of the nation's largest corporations, including healthcare/insurance companies developing and delivering workplace violence prevention and intervention training programs, including training corporate threat assessment teams. He is experienced in business continuity planning and exercises, including crisis management, crisis communications and use of social media in response to emergencies.
